BERT

Sequence

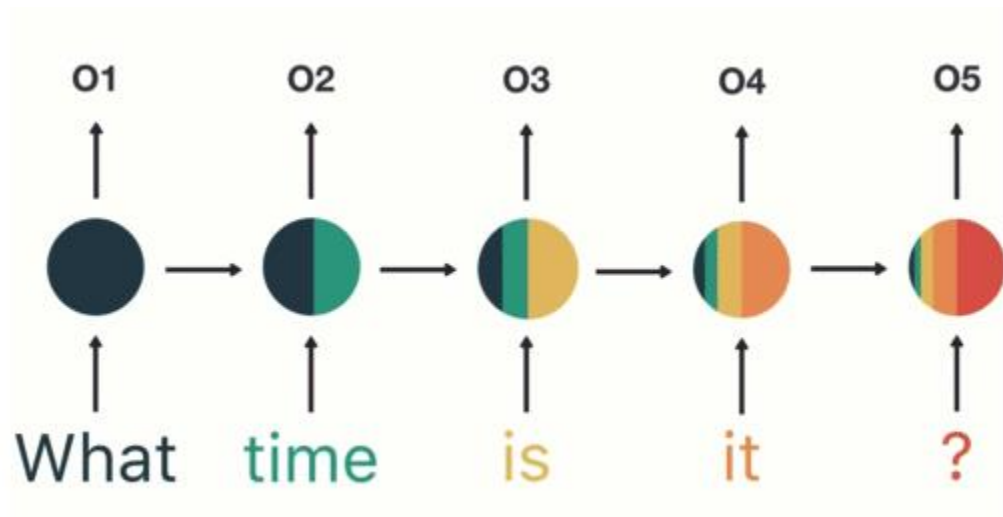

Sequence

단어의 순서?

RNN

RNN

X = 전처리한 단어 벡터
 H = 각 셀 별 연산 결과
(batch_size, sequence_len,
word_embedding_len)

RNN

Vanilla RNN, LSTM, GRU

Vanilla RNN

Vanishing gradient

$$h_t = \tanh(W_h h_{t-1} + W_x x_t + b)$$

$$h_t = \tanh(W_h \tanh(W_h h_{t-2} + W_x x_{t-1} + b) + W_x x_t + b)$$

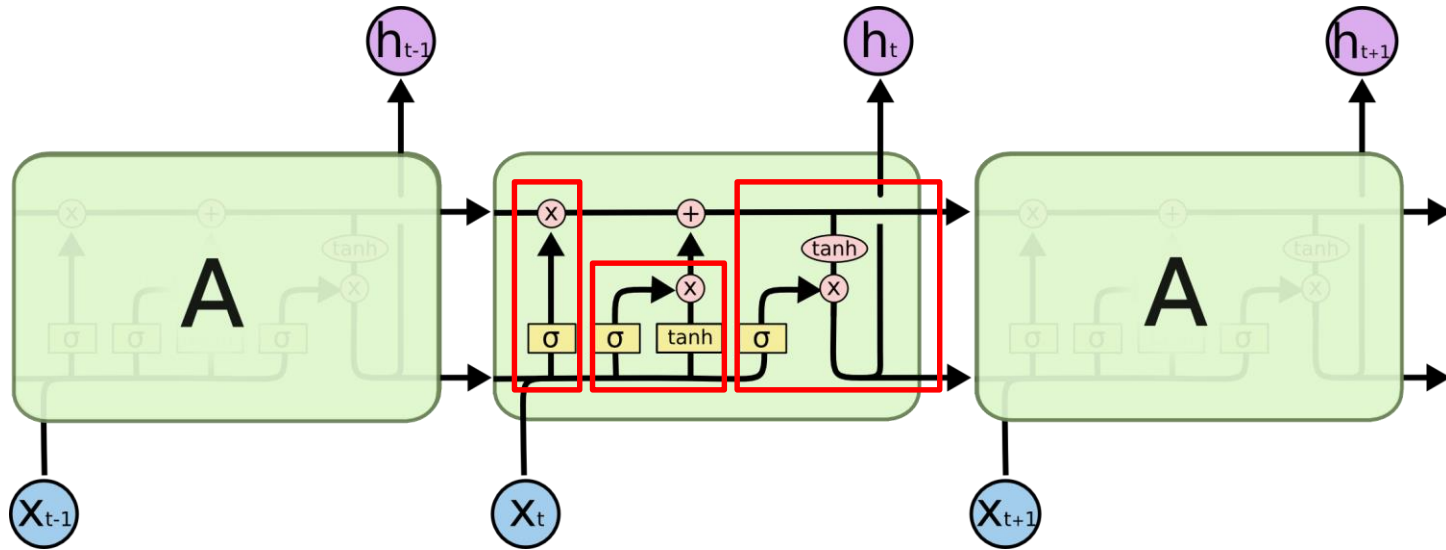

$$h_t = \boxed{\tanh(W_h \tanh(W_h \tanh(W_h h_{t-3} + W_x x_{t-2} + b) + W_x x_{t-1} + b) + W_x x_t + b)}$$

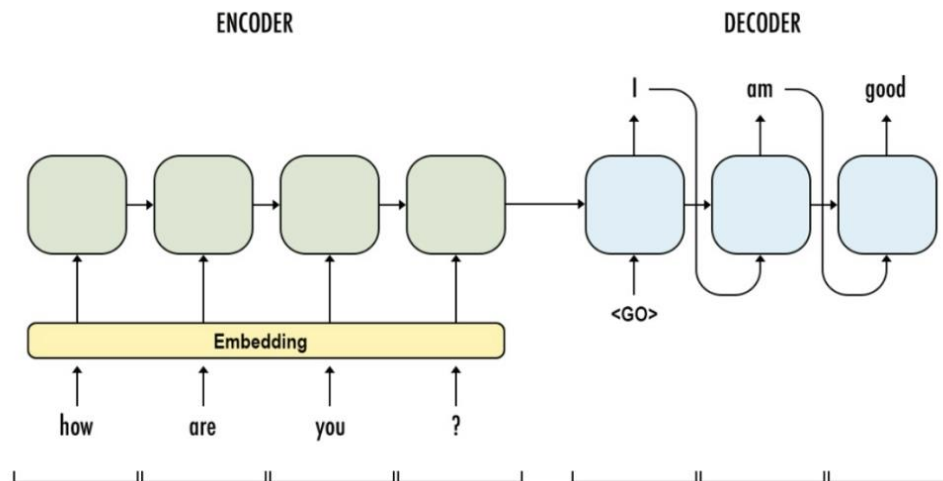

LSTM(Long short-term memory)

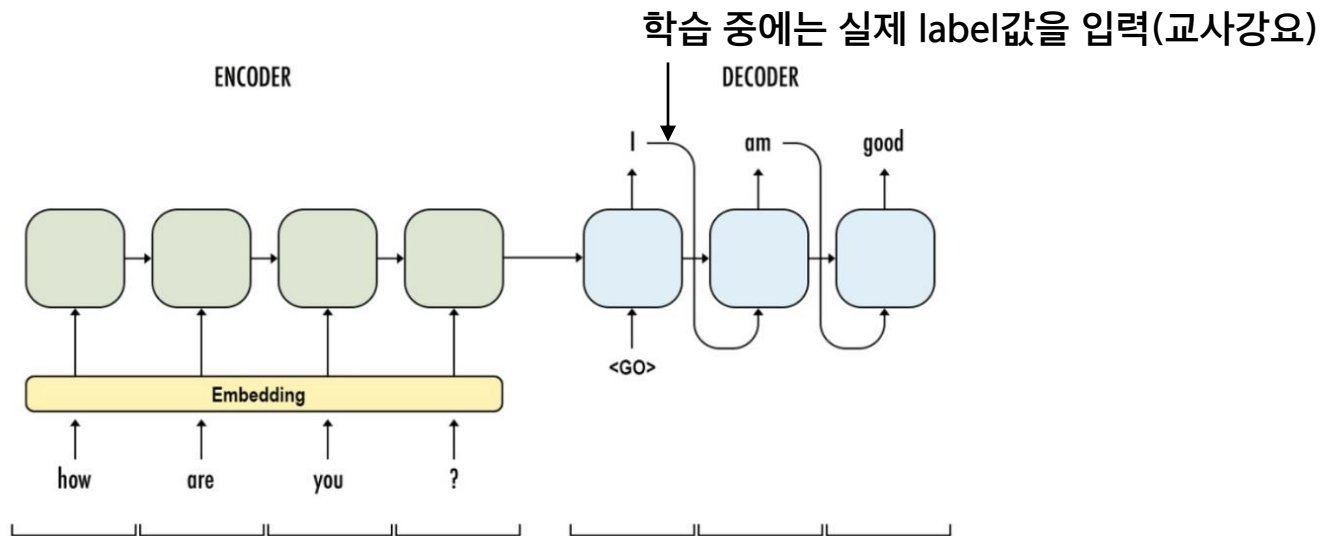

LSTM(Long short-term memory)

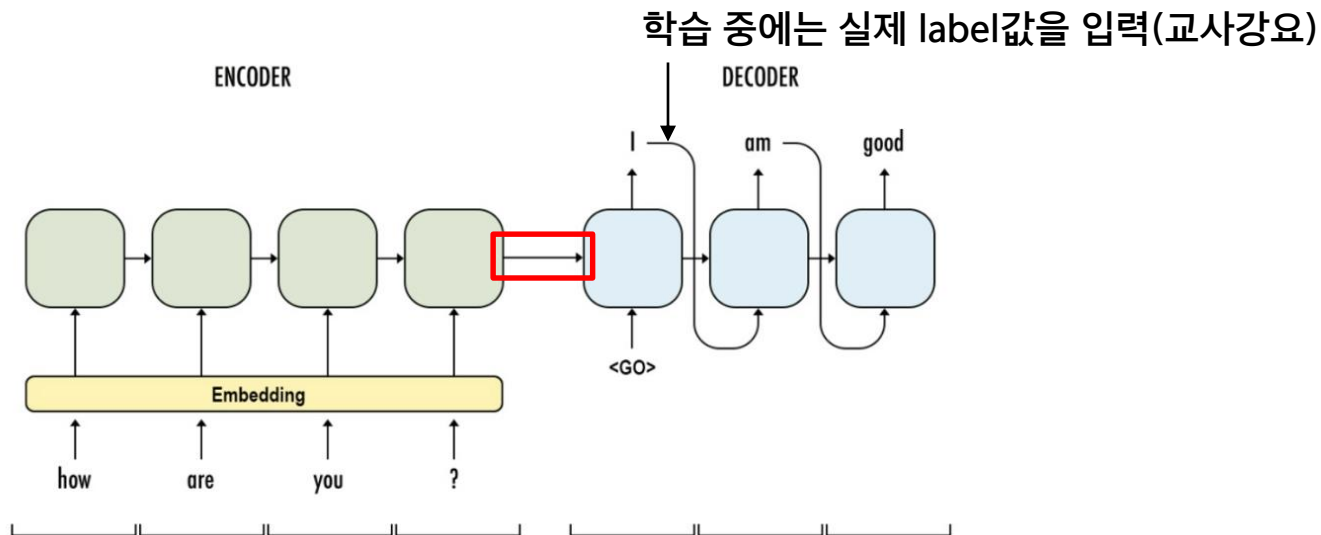

Seq2Seq?

Seq2Seq

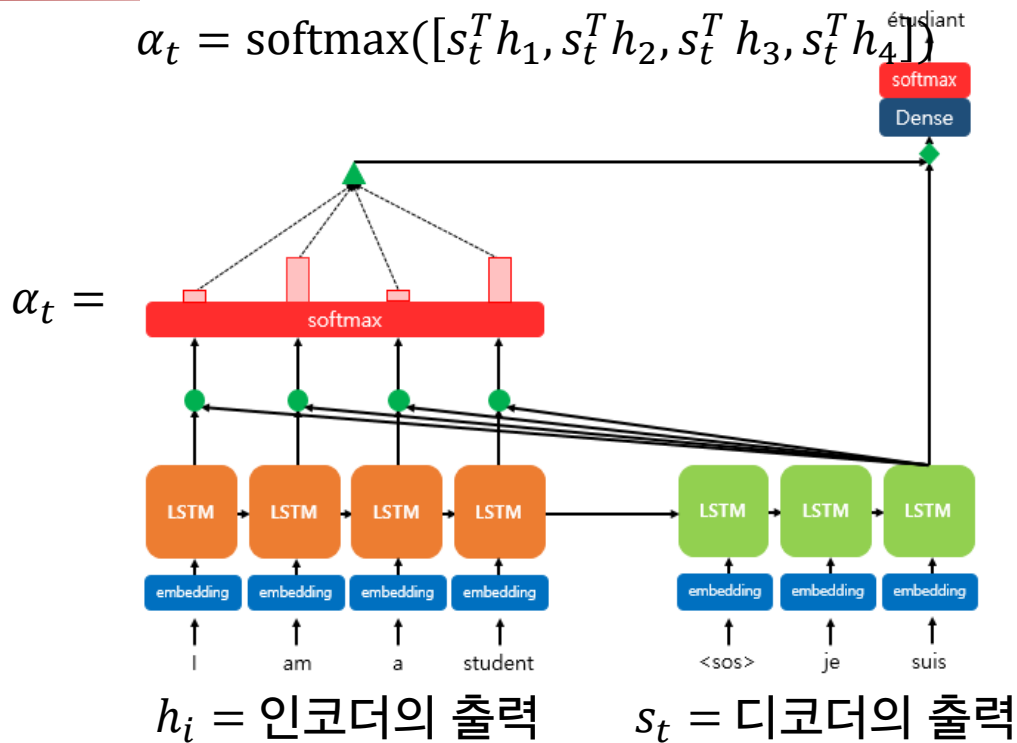

Seq2Seq

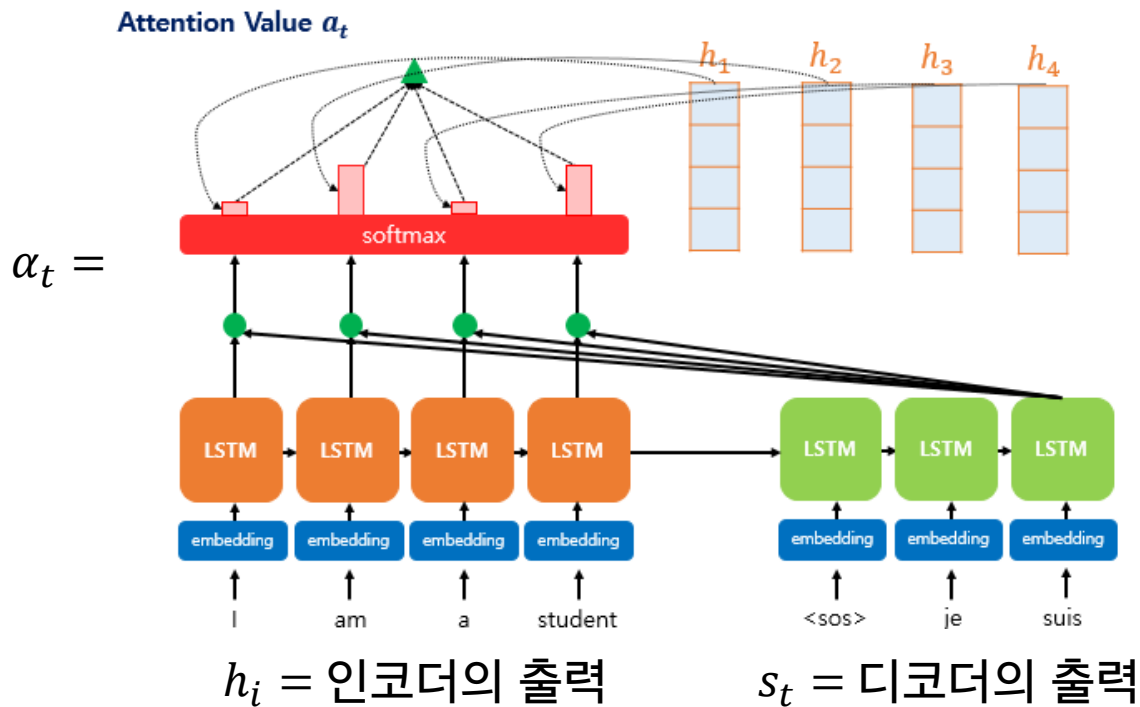

1. 한정된 context 벡터 크기
2. Sequence가 길어질 때

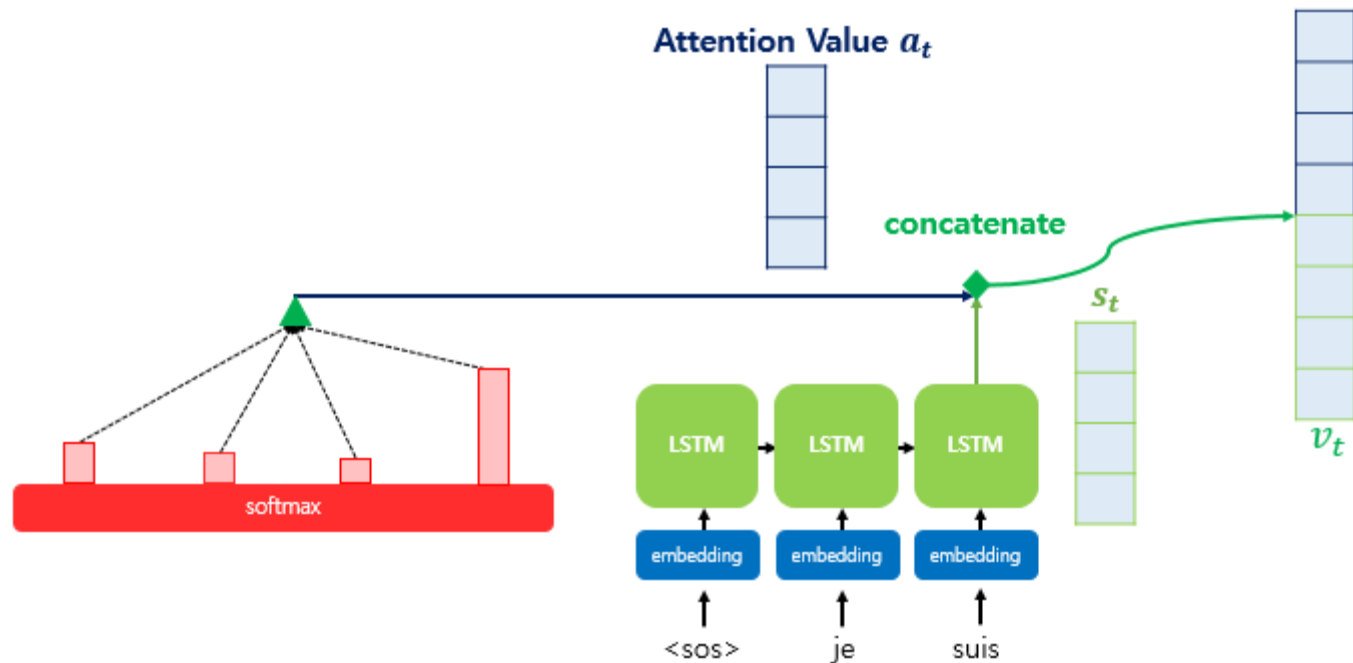

Attention

Attention

Attention

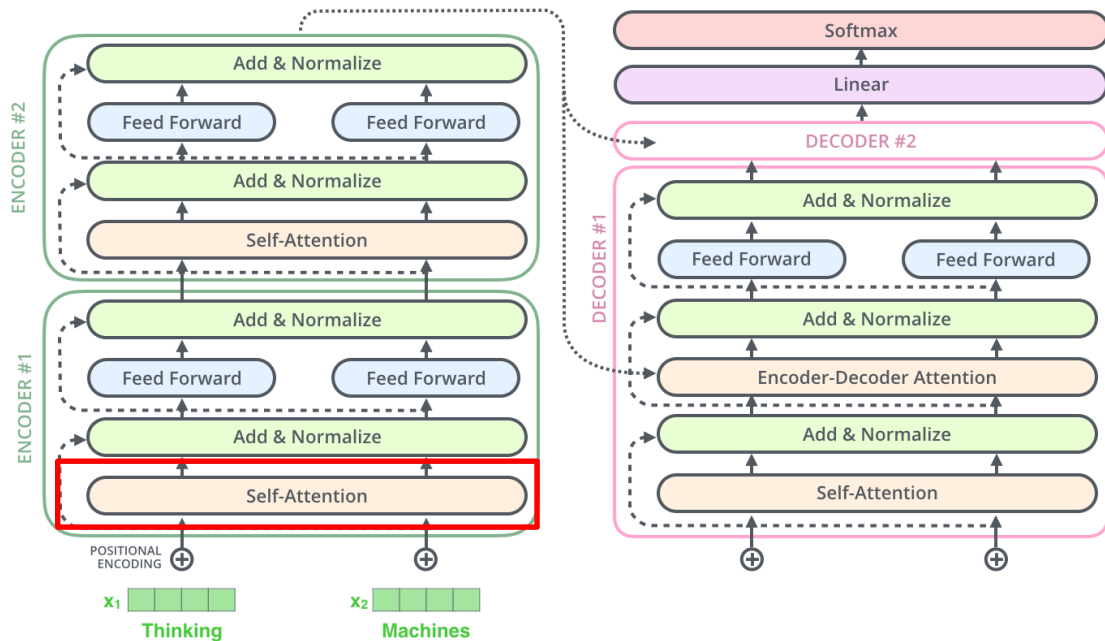

Transformer

**RNN을 쓰지 않고
보정용이 아니라 순수 Attention만 써서?**

Attention Is All You Need(2017)

Transformer

Transformer

단어의 순서?

Positional Encoding!

Transformer

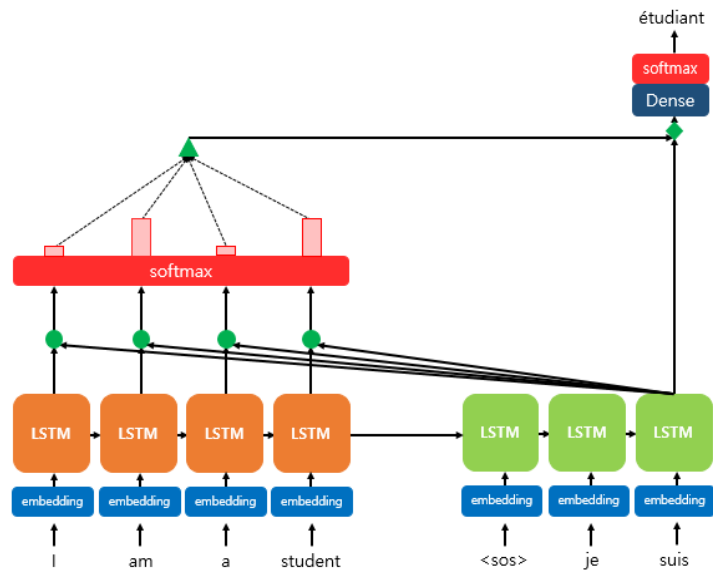

+

$$PE_{(pos, 2i)} = \sin(pos/10000^{2i/d_{model}})$$

$$PE_{(pos, 2i+1)} = \cos(pos/10000^{2i/d_{model}})$$

Transformer

Attention에 대한 이해

Transformer

Query, Key, Value

Q와 유사한 것을 찾기 위해 Q와 K로 특정한 연산을 한 뒤, 유사도를 계산

높은 유사도를 갖는 애의 Value를 더 많이 참고하여 어텐션 벡터를 구한다.

Transformer

Q와 K와 V사이
연산으로 추상화 가능

$$\text{softmax}\left(\frac{\begin{matrix} \text{Q} \\ \begin{matrix} \square & \square & \square \\ \square & \square & \square \end{matrix} \end{matrix} \times \begin{matrix} \text{K}^T \\ \begin{matrix} \square & \square \\ \square & \square \\ \square & \square \end{matrix} \end{matrix}}{\sqrt{d_k}}\right) \begin{matrix} \text{V} \\ \begin{matrix} \square & \square & \square \\ \square & \square & \square \end{matrix} \end{matrix}$$
$$= \begin{matrix} \text{Z} \\ \begin{matrix} \square & \square & \square \\ \square & \square & \square \end{matrix} \end{matrix}$$

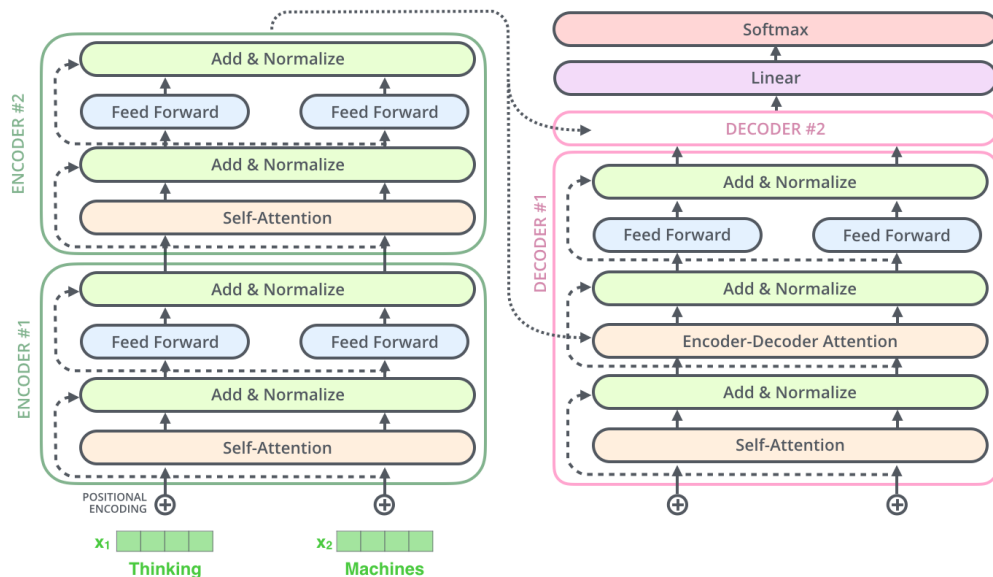

Transformer

Self Attention Encoder – Decoder Attention

Transformer

$$FFNN(x) = MAX(0, xW_1 + b_1)W_2 + b_2$$

BERT

Pre-training of Deep Bidirectional Transformers for Language Understanding (Bidirectional Encoder Representations from Transformer)

BERT

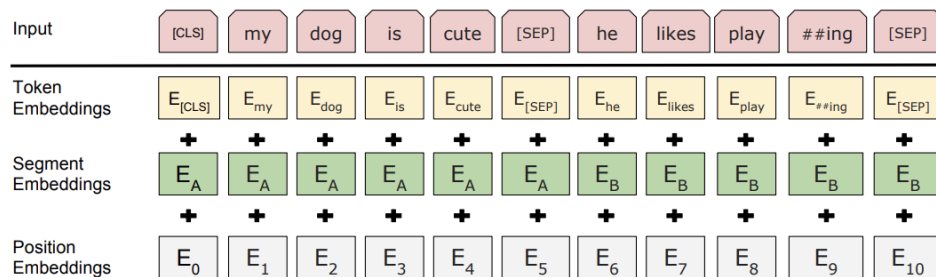

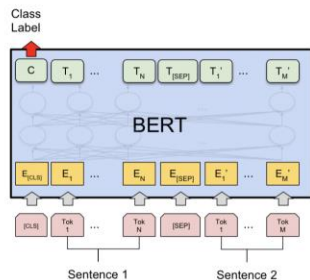

Figure 2: BERT input representation. The input embeddings is the sum of the token embeddings, the segmentation embeddings and the position embeddings.

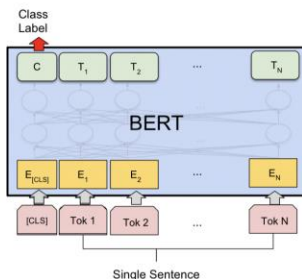

BERT

Finetuning에 매우 유용함

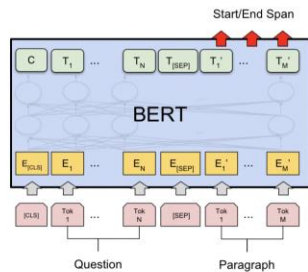

BERT

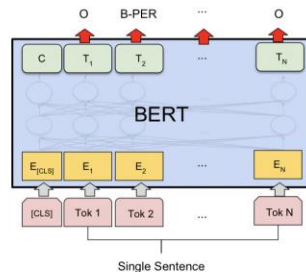

(a) Sentence Pair Classification Tasks:
MNLI, QQP, QNLI, STS-B, MRPC,
RTE, SWAG

(b) Single Sentence Classification Tasks:
SST-2, CoLA

(c) Question Answering Tasks:
SQuAD v1.1

(d) Single Sentence Tagging Tasks:
CoNLL-2003 NER

BERT

The first recorded travels by Europeans to China and back date from this time. The most famous traveler of the period was the Venetian Marco Polo, whose account of his trip to "Cambaluc," the capital of the Great Khan, and of life there astounded the people of Europe. The account of his travels, Il milione (or, The Million, known in English as the Travels of Marco Polo), appeared about the year 1299. Some argue over the accuracy of Marco Polo's accounts due to the lack of mentioning the Great Wall of China, tea houses, which would have been a prominent sight since Europeans had yet to adopt a tea culture, as well the practice of foot binding by the women in capital of the Great Khan. Some suggest that Marco Polo acquired much of his knowledge through contact with Persian traders since many of the places he named were in Persian.

How did some suspect that Polo learned about China instead of by actually visiting it?

Answer: through contact with Persian traders

런던 놀러가자 - 장소 예약
강남가는 버스가 있어? - 장소 교통수단 물음

오늘 택배 온대
혁 말만 들어도 설렌다 - Positive Sample
